

Critical Life Skills

Career and Technical Education prepares students for life long learning.

To accomplish this goal the department has identified Critical Life Skills that learners acquire during their academic pursuits.

The Critical Life Skills are vital for occupational and personal success in today's world.

Career and Technical Education graduates can

- communicate effectively
- problem solve
- interact with others effectively
- cope with change
- perform with self sufficiency
- A successful future in the job market depends upon having these skills.

These Critical Life Skills are integrated throughout all CTE programs in

- course work
- extra curricular activities
- leadership roles
- other learning opportunities

Students learn, apply and transfer these Critical Life Skills. Advisors and counselors have additional information on how to develop a plan for success.

Career and Technical Education Team Mission Statement

To empower people with the knowledge and skills necessary for career and development and life success in a technological and global society

What is Career and Technical Education?

Career and Technical Education focuses on exploration of the self in relation to the world of careers and productive citizenship.

Through Career and Technical Education, students experience rigorous and challenging classroom instruction linked to relevant, structured, real-world experiences. Students learn from educators and business and industry leaders what is expected from them in the workplace; and they see how classroom learning applies directly to their future adult roles as family members, workers, and citizens. They are provided multiple opportunities to assess their interests, work behaviors, and aptitudes. They are introduced to a variety of career options and learn the level of skills and education required for those careers. In short, students leave schools better prepared for, and are more focused about their future and education choices.
